Hindi English

As a Frontend Engineer, I specialize in designing and implementing robust functionalities for web applications, leveraging React.js, Next.js, TypeScript, and advanced form management with hooks like useForm. My work includes integrating secure user authentication with JWT tokens and developing modular features to enhance user experiences. I contribute to various projects, ensuring seamless functionality, optimizing performance, and refining frontend features across diverse web platforms.

Projects

Projects Wallt ,Gatoes,Athlete
Admin Panel

- **Tech Stack:** React.js, Bootstrap, useForm (React hook), Formik, Redux Toolkit
- **User Authentication:** Implemented secure user authentication and authorization using access and refresh JWT tokens for session management.
- **State Management:** Utilized Redux Toolkit for efficient global state management, ensuring smooth application flow and scalability.
- **API Integration:** Worked extensively with various APIs, handling common HTTP methods such as GET, POST, PUT, PATCH, and DELETE, ensuring robust data communication between the front-end and back-end services.

KKbits

A kyc web app for user

https://kkbitstv2.illuminz.com/

- Developed and integrated key modules in a dynamic web portal, including KYC verification, face authentication, money transfer, and a currency converter.
- Utilized RTK Query for efficient API interactions and Formik for form handling.
- The project leveraged React.js, Next.js, TypeScript, Format, useForm hook, and Redux Toolkit for state management and scalability.
- Focused on responsive design, security best practices, and seamless API integration to ensure a smooth and robust user experience.

Face-authentication, wallet, money transfery, curreny exchange

Picasso Admin Portal,Picaso Delivery App

https://delivery.illuminz.com/

- Implemented a comprehensive tracking system across both web and admin portals, including the development of zones and regions for delivery management.
- Led the creation of multiple module functionalities within the admin portal.
- The tech stack includes React.js, Next.js, TypeScript, Formik, useForm hook, Redux Toolkit, and Cookies for state management and authentication.
- Additionally, spearheaded the development of the entire admin panel and tracking module for the web portal.

Athlete plus,OnCall web App,Wallt web App

Document Store app

https://wallt.illuminz.com

- **rontend Development:** Expertise in React.js, Next.js, TypeScript, and Form management using useForm hook and Format.
- **User Authentication:** Integrated secure user authentication and authorization with access and refresh JWT tokens.
- **Modular Functionality:** Developed and implemented multiple functional modules within the web application for seamless user experience.

Experience

Illuminz

July 2023 - Present

Front-end Developer

Mohali

https://www.illuminz.com/

- While working in this company, a significant portion of my responsibilities revolved around implementing various functionalities.
- I took a lead role in developing an admin panel website, where my primary focus was on incorporating practical features. This web admin panel allows users to efficiently store documents, and I integrated essential elements such as a CRM module with ACL, ensuring comprehensive access control.
- Moreover, my contributions extended to another website dedicated to fundraising for athletes. In this project, I emphasized implementing functionalities that enable users to follow athletes, make fund donations, and enjoy additional features for an enhanced user experience.
- In a separate project involving an on-call website, my primary objective was to implement functionalities that facilitate the easy summoning of professionals like online plumbers for various tasks.
- Throughout my tenure, I have consistently prioritized the effective implementation of functionalities to enhance the overall usability and efficiency of the systems I worked on.

Pocket HRMS - Payroll Software Provider
Company, Gurugram Haryana

April 2022 - June 2023
GURUGRAM

Frontend Developer

I have got an exposure which led the conceptualisation, and development of visually appealing and user-friendly layouts for web applications websites.

Spearheaded the development of dynamic and feature-rich websites using React.Js and other front-end technologies.
